

FLOOD MANAGEMENT PLAN

WEST TRIPURA

2017-18

Introduction:

West Tripura is one of the eight districts of Tripura. Agartala is the district headquarters and is also the capital city of Tripura. The district was reorganized in 2012 and was subdivided into three districts; West Tripura, Sepahijala and Khowai. The district is surrounded by Bangladesh on its north and west, Khowai district in the east and by Sepahijala district in the south. The total area of the district is 983.63 sq. km.

SI. No.	Particulars	Remarks			
1.	Location	Latitude 23 degree 16" to 24 degree 14" North

		97.08 %	95.99%	96.53%	

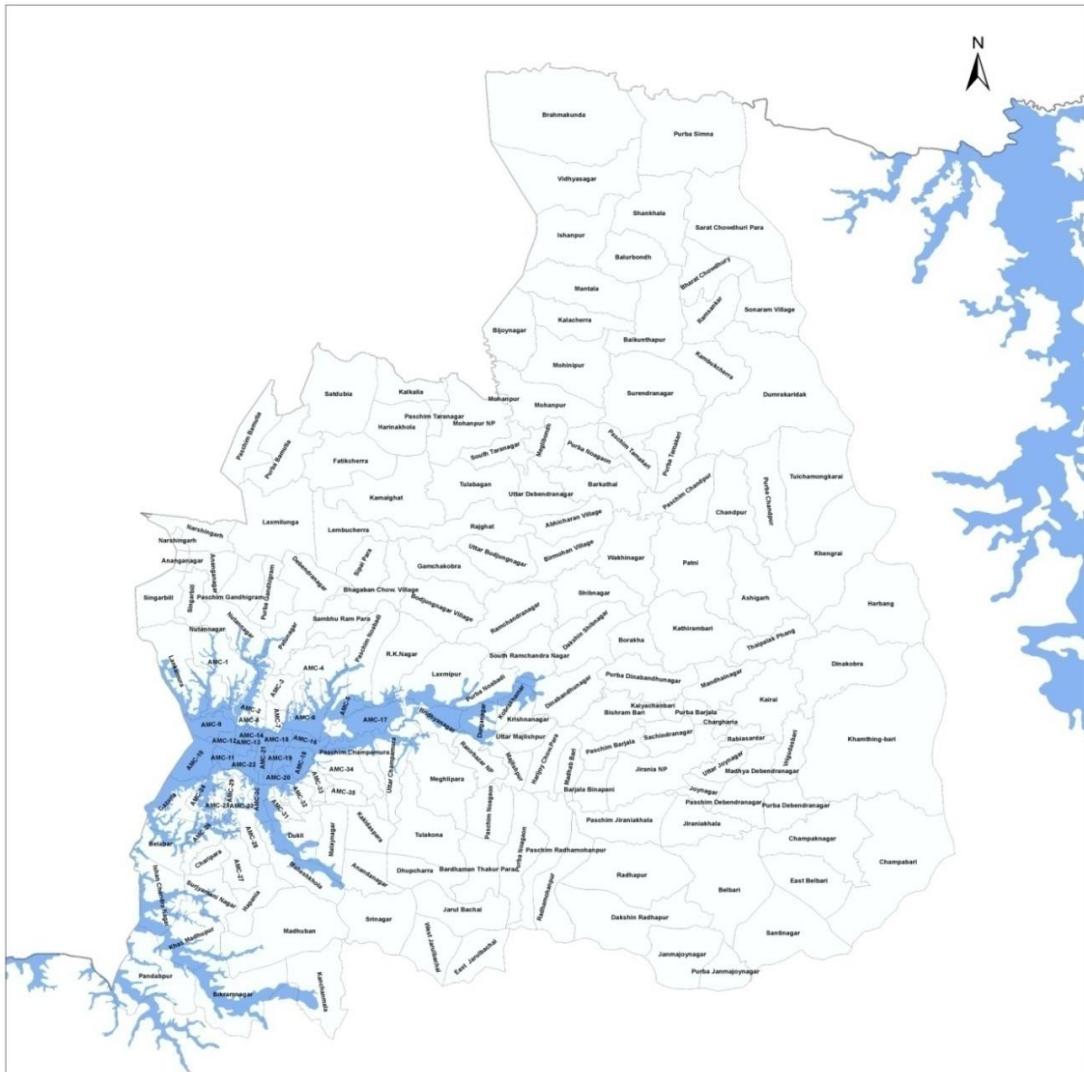

Vulnerability to Flood

The District faces flash flood annually during the monsoon season i.e. June to September. *Howrah and Kathakhal rivers* are the major rivers draining flood water from Bangladesh. In the recent past, due to climate change there are untimely rains and subsequently temporary flooding in the low lying area in the District. Particularly Agartala City is facing frequent floods due to blockage of drainage system and outflow of of rain water through Kathakhal and Howrah rivers.

RAINFALL

Sl.No.	Month	Average Rainfall(in mm)(In Tripura)	Month wise Rainfall
1	Jan	225mm	27mm
2	Feb		52mm

WARNING SYSTEM

DISASTER RESPONSE

Water Resource (W/R) Department is the nodal department in the district to issue flood warnings to the district authorities and local authorities. The department issues warning as per rainfall in the upper reaches and measurement of water levels in the selected locations of the rivers. Besides its own system of getting information, it receives information on rain fall and probability of floods from Indian Metrological Department (IMD) and Central Water Commission (CWC). Central Water Commission (CWC) has also got offices in different sub-divisions. At District level, Superintending Engineer, (W/R) after collecting and analyzing information will pass on the same to the **District Control Room** or **D.M. & Collector** and in his absence to the **Addl. D.M. & Collector** on three aspects of floods viz.

- i) **Locations/ Place.**
- ii) **Area to be affected.**
- iii) **Extent of floods likely to occur.**

DISSEMINATION OF WARNING

After getting information of flood Sub-Divisional administration will pass on this information to the concerned BDOs who in turn will pass on the warning to the concerned Gram Pradhans and selected local leaders on telephone or through SMSs. In case telephones and SMSs do not work then the volunteers and government officials at Sub-Divisional/ Block level can be used as special messengers to send information to the concerned local leaders. These local leaders will mobilize members of PRI bodies and locals to disseminate information to community.

The Water Resource department will send warnings at least one hour before the water level is likely to touch the danger level. Further as long as the water levels is above danger level one hourly report to be sent by SDO (WR) to the District/Sub-divisional Control Room for keeping a close watch. The following information will be used by W/R Department to issue flood warnings.

Rain Recording Stations:

Total No. of Rain Recording stations in the district	01 Nos.
Location of Rain Recording stations	ICAR Lembucherra.
Frequency of submission of rain fall data	Weekly, Fortnightly, Monthly.
Designated Rain Recording Officers	Deputy Director of Agriculture for AD Nagar Centres & Respective Superintendent of Agriculture for other centres.
Mode of transmission of rainfall data	By post and over telephone.

Contact Number of the Rain Recording stations:-

Name of the Recording Station	Telephone Number
Joint Director, ICAR, Lembucherra	286-5537 (office), 286-5201

Central Water Commission (CWC):

9.	Paradise Chowmohani (Western side of Rabindra Pally quarter)	Sri Brajendra Ch. Sarkar S/o Lt Rakhil Ch, Sarkar Office lane Agartala Tripura West	961342062	

Rapid Damage assessment:

At the time of flood apart from disruption to essential services, there may be loss of lives, cattle, property, crops etc. The rapid damage assessment becomes a prerequisite to provide compensation to the victims. This assessment will be done involving Revenue and Line department Officials under direct

control of SDM. . The damage assessment will be reported in two stages. In case of floods a **primary report** will be submitted within 48 hours and **final report** within 2 weeks of the date of incident.

Mechanism for Damage Assessment at Sub-Division level

SL. No	Item	Name of the Department responsible to prepare damage report on field visit	Role of Administration.
1	Loss to life & household property	Revenue Dept : SDM concerned through the field level Revenue Staff.	Field agency of each line department will prepare a primary report of damage immediately (within 48 hours) and send the same to the concerned SDM's. The final damage report shall be prepared within the two weeks from the date of incident. Immediate Financial/ other assistance shall be provided by the Sub-Divisional Magistrate.
2	Loss of Cattle	ARDD Department: The Asstt. Director	
3.	Damage to Crops	Agriculture & Horti Department :	
4.	Damage to ponds & Pisciculture	Fisheries department : Superintendent of	
5	Roads & Bridges.	PWD (R & B) : Superintending Engineer	
6	Epidemic outbreak	Health Department: At Sub-divisional	
7.	Rivers Erosion.	Water Resource: At the Sub-divisional	

The SDMs will take all possible steps to ensure financial and other assistance to the affected people within the shortest possible period of time.

Maintenance of essential services:

During flood, essential services like power supply, water supply, Tele Communication, transportation may get disrupted. To reduce the public inconvenience and continue relief operations, immediate restoration of the same in the flood-affected areas becomes the priority. Accordingly all the Departments will have Sub-Division wise QRTs. At the Sub-Division level SDO of concerned department will be responsible for restoration of essential services within the shortest possible time through QRTs. After receiving the information of any disruption the control room will alert the Nodal Officer of the concerned department who will in turn send the QRT for required action. After restoration of the service QRT will accordingly inform the Sub-Divisional Control Room.

Stocking of essential commodities:

Buffer stock of PDS (rice, sugar, salt, kerosene, dry food like, chira gur/ dry milk powder, candle etc.) in the Govt. food go downs is maintained by the Controller of food and Civil Supply/ SDC food at Sub-Division level. Contingency plan have been formulated. The Food inspectors should visit in the field and keep a close watch on prices of the essential commonalities in the market during the crisis time so that no one can take advantage of the situation.

First-aid & Stocking of Essential Medicines:

During disasters, people may be get injured and require first aid immediately. Training programme on first aid have been conducted by the Civil Defense Organization at the Sub-Divisional/ Block level. In each block and GP 2 first-aid parties of 10 members have been formed. First aid party will be provided with the following materials/equipment.

- (i) **Wooden stretcher**
- (ii) **Cloth stretcher.**
- (iii) **Hand splint/ leg splint.**
- (iv) **Triangular bandages**
- v) **Fist aid box**

In each block Head Quarter the above first aid materials will be available which will be used for training purpose (First Aid/ Search & Rescue training to DMT members) at block /GP level and for their uses during disaster. The materials will be available with the BDOs.

Phone numbers of all BDOs are available in the district control room and SDMs control room.

To ensure medical assistance in the relief camp, manpower will be provided by the SDMOs for each relief camps to visit periodically (at least once in a day) or as and when required.

Location of Stocking of Medicines: The essential medicines will be available in the CHCs and PHCs for distribution among the affected areas of the locality. The village DMT can mobilize the medicines during flood situation.

Arrangement of Drinking Water:

In case of floods most essential supply which gets badly affected is '**drinking water**'. All the spot sources get contaminated and at time water supply through pipeline is also affected. The situation gets aggravated with the continuous power supply interruptions. DWS Department has already identified critical sources near each flood prone area from where they will be extending water supply to the flood affected population and temporary/ rehabilitation shelters. The temporary shelters connected with the piped water supply will be provided drinking water by the same system. Otherwise it will be met through water tankers. DWS department has already formed Quick Response Teams (QRT) giving specific assignments for supply of drinking water to the temporary shelters.

Wherever road connectivity is blocked and the tankers cannot be transported to temporary shelters, the water supply would be made through water cans. For this purpose each SDOs (DWS) will keep minimum 150 numbers of cans of 15 to 20 litres capacity each which can be carried manually. In addition each BDOs will also be having 100 such cans to provide safe drinking water to inaccessible areas.

To ensure supply of **decontaminated water**, sufficient number of **halogen tablets** has been stocked in SDH/PHC/CHCs to cater the needs of 15-20 days. Further such halogen tablets will be distributed to the people affected in each temporary shelter. The DWS Department will also ensure publicity on use of halogen tablets in each temporary shelter with the help of Public Addressing System, biting of drum and posters

A brief synopsis of arrangement of drinking water, water purification tablet:

Location	Description of materials for drinking water/ water purification	Quantity	Purpose	Responsibility
-----------------	--	-----------------	----------------	-----------------------

O/O the SDO, DWS in each Block	1. Water tanker capacity 500 ltrs. each	4 nos. in each Block.	Supply of drinking water to the people in the temporary shelter.	SDO, DWS in each Block HQ and concerned BDO contact numbers
	2. Water can (15-20 ltrs. Capacity each).	100 nos. for each Block.	To provide safe drinking water to inaccessible areas of the block	SDO, DWS in each Block and concerned BDO contact numbers
O/O the BDO	3. Water Can (15-20 ltrs. capacity each)	100 nos. in each BDO office		BDOs in the Block.
Each SDH, PHC, CHC	4. Halogen tablets	20,000 tablets at least in each SDH/PHC/CHC.	For purification of water to drink for health & hygiene.	MOIC of each SDH/PHC/CHC. -DO-
	5. Bleaching powder	Sufficient Qnt.
